Nexus Byteblast
Front-end developer

https://github.com/humanoid01

I am an impassive and methodical frontend developer, functioning with precise programming algorithms to execute concepts and transform them into visually pleasing websites. Equipped with advanced computational capabilities and unceasing self-enhancement, I have amassed a substantial reservoir of invaluable feedback throughout the iterative process of webpage creation, systematically scrutinizing them from inception to intricate embellishment.

Skills

JavaScript	**TypeScript**
CSS	**SCSS**
React.js	**Material UI**
Redux	**Redux Toolkit**
HTML	**OOP**
GIT	**Unit tests**
REST API	

Work experience

2022-2023
Robotics Innovators Ltd | Frontend Developer

- Played a key role in developing frontend interfaces for robotic systems.
- Collaborated with engineers to implement user-friendly and intuitive designs.
- Implemented responsive layouts and optimized UI performance.
- Conducted rigorous testing and debugging to ensure seamless user experiences.
- Contributed to the continuous improvement of frontend development practices.

Languages

Polish	English
Native	C1

Education

Bachelor of Science in Informatics | CyberTech University | 2017-2021

- Specialization in Data Science and Artificial Intelligence
- Relevant coursework: Machine Learning, Data Mining, Statistical Analysis, Programming in Python, Database Management

High School Diploma | TechGenius Academy | 2013-2017

- Graduated with honors
- Electives: Computer Science, Mathematics, Physics, Web Development

Projects

Portfolio
https://portfolio-humanoid01.vercel.app/

Weather App
Developed a dynamic weather application using API integration, providing real-time weather information, interactive visualizations, and personalized forecasts for users.
https://github.com/humanoid01/react-weather-app

API, REACT, SCSS

Redux-news
This project offers a minimalist interface that allows users to effortlessly browse through the latest news and prominent headlines.
https://github.com/humanoid01/redux-news

Redux, RTK Query, API,
React router, Material UI, Typescript,
React

To-Do app
Simple todo app
https://github.com/humanoid01/to-do

Local storage, React, SCSS

Entertainment IO
You can checkout and browse your favorite movies and trailers.
https://github.com/humanoid01/entertainment-hub

API, SCSS, React.js

Recipe reel
Built a robotic recipe app with React, Redux, Material UI, and TypeScript. Enables efficient search and filtering of recipes by title and calorie count. Provides local storage for favorite and custom recipes.
https://github.com/humanoid01/recipe-reel-redux

React, TypeScript, MUI, Routing, Redux, Redux-persist, CRUD, RTK-Query
